SUMMARY

Data and AI professional with 3+ years across financial services and AI product work, building analytics, ETL/ELT pipelines, dashboards, and machine-learning applications with SQL, Python, Tableau, and cloud data platforms. Experienced with credit, loan, and structured finance data, automating reporting workflows, improving data quality, and turning complex datasets into decisions leadership can act on.

EDUCATION

UCSD Rady School of Management, San Diego, CA, U.S. 2026
Master of Science in Business Analytics (GPA: 3.89)
Relevant Courses: SQL and ETL, Collecting & Analyzing Large Data, AI & Prescriptive Analytics, GenAI for Business, Customer Analytics

DENISON UNIVERSITY, Granville, OH, U.S. 2022
Double Bachelor of Arts in Financial Economics & Data Analytics (GPA: 3.50)
Awards: Alumni Award Merit Scholarship, Senior Economics Fellow, Mortar Board Member

SKILLS

- **Programming & Data Engineering:** SQL, Python, Pandas, NumPy, R, ETL/ELT, Data Pipelines, AWS (Athena), Snowflake, Databricks, Excel
- **Machine Learning & AI:** Scikit-learn, TensorFlow, Keras, Regression, Tree Models, Neural Networks, Feature Engineering, GenAI
- **Analytics & Statistics:** Exploratory Data Analysis, A/B Testing, Hypothesis Testing, Variance Analysis, Data Quality, Data Governance
- **Visualization & BI:** Tableau, Tableau Prep, Dashboard Development, KPI Reporting, Reporting Automation, Executive Reporting, PowerPoint
- **Business & Workflow:** Business Analysis, Requirements Translation, Stakeholder Communication, Process Improvement, Git, GitHub, JIRA
- **AI Tools:** ChatGPT, Claude, Gemini, Claude Code, Codex, Claude Cowork

EXPERIENCE

360 One Firm (361Firm), San Diego, CA, U.S. Jun 2026 – Present
AI & Data Product Engineer (Intern):

- Engineered a pipeline converting 300+ YouTube transcripts into structured reports in three days, automating 2 recurring workflows.
- Enriched the member database with industry interests and engagement signals from WhatsApp, email, and Zoom transcripts.
- Prototyped 2 features for the firm's product website using Next.js and Python, both now integrated into the live site.

Dhauz AI Consulting | Quantum Rise, San Diego, CA, U.S. Mar 2026 – Jun 2026
AI Engineer & Client Communications Lead:

- Gathered, wrangled and analyzed 971,000 MIMIC-IV care encounters using SQL and Python to identify clinical indicators and simulate NEWS2 scores used to flag patients at risk of deterioration for a Telegram-based AI chatbot.
- Translated nurse workflow needs into chatbot requirements, patient-alert rules, user stories, and usability metrics, helping the technical team build and evaluate a testable clinical AI prototype.

Morningstar DBRS, Inc., Chicago, U.S. Apr 2023 – Jun 2025
Data Analyst:

- Analyzed deal inflow, issuance, and loan-performance data using SQL, Python, and Tableau to identify key metrics, outliers, and improvement opportunities, informing decisions across 10+ cross-functional teams.
- Designed and standardized Tableau dashboards that highlighted loan and asset-class performance trends for internal stakeholders, reducing recurring manual reporting effort by 95%.
- Developed Python ETL/ELT pipelines to clean, transform, and standardize third-party vendor data for QA validation and Credit Data Hub integration, reducing manual data-cleaning effort by 98%.
- Optimized Tableau reporting performance by converting 120+ front-end calculations into backend SQL, reducing refresh times from 5–10 minutes to under two minutes and lowering processing costs by 97%.
- Automated ABS loan-data ingestion, cleaning, and transformation from AWS Athena into reusable Tableau Prep workflows adopted by other analysts and the EU ABS team, turning a three-day manual process into a one-click workflow.
- Produced executive summaries, presentations, and documentation on loan and asset-class performance shared with upper management, translating technical analysis into insights leadership could act on.

Credit Ratings Analyst: Jul 2022 – Apr 2023

- Maintained 99% accuracy across 15+ cash-flow and scenario analyses spanning multiple commercial real-estate property types, supporting time-sensitive credit decisions during high-volume deal flow.

Centre for Development of Advanced Computing (CDAC), Pune, India Jun 2021 – Jul 2021
Machine Learning Intern:

- Trained an incremental-learning image model in TensorFlow/Keras, updating continuously as new data arrived, 98.1% test accuracy.

PROJECTS

Credit Data Hub: Morningstar DBRS, SFA Data Analytics Team Jan 2024 – Jun 2025

- Built a cross-validation framework using SQL, Python, and Tableau Prep to reconcile third-party vendor data against AWS S3/Athena across North American and European CMBS, ABS, and RMBS datasets.
- Investigated discrepancies, documented remediation rules, and partnered with Data Engineering to strengthen data governance.

Concept ABS Data Pipeline Automation: Morningstar DBRS, SFA Data Analytics Team Sep 2023 – Feb 2024

- Mapped the EU ABS team's manual quarterly reporting process across AWS Athena, Excel, and Tableau, translating analyst requirements into standardized data-cleaning and transformation rules.
- Formalized deal-name alignment, duplicate handling, naming conventions, and date validation into reusable QA rules.

LEADERSHIP EXPERIENCE

ERG Leadership Member: Women In Technology, Morningstar Inc. Jun 2024 – Jun 2025

- Organized 5+ Women in Technology events, coordinating logistics, communications, and leadership updates.
