

Eesha Jagdhane

Data Analyst | MSBA Student at UC San Diego | San Diego, CA

EDUCATION

UCSD Rady School of Management, San Diego, CA, U.S. Dec 2026
Master of Science in Business Analytics (GPA: 3.89)
Relevant Courses: SQL and ETL, Collecting & Analyzing Large Data, Customer Analytics, AI & Prescriptive Analytics, Marketing Analytics, GenAI for Business, Data Driven Communications, Managerial Judgment and Decision Making

DENISON UNIVERSITY, Granville, OH, U.S. May 2022
Double Bachelor of Arts in Financial Economics & Data Analytics (GPA: 3.50)
Awards: Alumni Award Merit Scholarship, Senior Economics Fellow, Mortar Board Member

SKILLS

- **Programming & Data Engineering:** SQL, Python, Pandas, NumPy, PostgreSQL, Snowflake, AWS Athena, Databricks, ETL, Data Pipelines, Excel
- **Machine Learning & AI:** Scikit-learn, TensorFlow, Keras, Regression, Tree Models, Neural Networks, Feature Engineering, Model Evaluation
- **Analytics & Statistics:** Exploratory Data Analysis, Data Validation, A/B Testing, Hypothesis Testing, KPI Validation, Variance Analysis
- **Visualization & BI:** Tableau, Tableau Prep, Dashboard Development, KPI Reporting, PowerPoint
- **Workflow & Collaboration:** Git, GitHub, JIRA, Requirements Translation, Stakeholder Communication
- **AI Tools:** ChatGPT, Claude, Gemini, Claude Code, Codex
- **Languages:** English, Marathi, Hindi

EXPERIENCE

Dhauz AI Consulting | Quantum Rise, San Diego, CA, U.S. Mar 2026 – Jun 2026
AI Engineer & Client Communications Lead:

- Translated ambiguous nurse workflow needs into chatbot requirements, deterioration alert rules, user stories, and usability metrics, turning clinical operations pain points into a testable AI alert prototype.
- Queried and analyzed MIMIC-IV clinical data using SQL and Python to identify patient deterioration indicators, prepare candidate features, evaluate feasibility, and support NEWS2-based alert logic.
- Designed evaluation criteria for clinical risk outputs, connecting alert accuracy, latency, usability, and safety considerations to potential workflow and cost impact.

Morningstar DBRS, Inc., Chicago, U.S. Apr 2023 – Jun 2025
Data Analyst:

- Analyzed deal inflow, issuance, and loan datasets across multiple asset classes using SQL, Python, AWS Athena, Excel, and Tableau to uncover trends, outliers, and reporting inconsistencies for 10+ stakeholder teams.
- Reconciled vendor files, AWS Athena tables, and Tableau outputs through variance analysis and source-to-dashboard validation, flagging metric issues before release to improve trust in downstream analytics.
- Developed standardized SQL views and Python-based data preparation workflows to transform raw financial and loan data into validated, reusable datasets, reducing recurring manual reporting effort by 95%.

Credit Ratings Analyst: Jul 2022 – Apr 2023

- Performed 15+ cash flows and scenario analyses across multiple CRE property types, supporting credit decisions under tight deadlines and high-volume deal flow.
- Maintained 99% accuracy across complex financial models through disciplined QA checks, structured review, and strong attention to detail during peak periods.

Centre for Development of Advanced Computing (CDAC), Pune, India Jun 2021 – Jul 2021
Machine Learning Intern:

- Developed an incremental learning model using NumPy, Pandas, TensorFlow, and Keras to support continuous model updates as new image data was introduced, achieving 0.981 testing accuracy and 0.999 training accuracy.
- Implemented a similarity-index approach to identify distorted images, comparing original images with an index of 1.00 against distorted images ranging from 0.15 to 0.85.

PROJECTS

Credit Data Hub: Morningstar DBRS, SFA Data Analytics Team Jan 2024 – Jun 2025

- Designed a SQL-based data validation framework to reconcile third-party vendor files against AWS Athena records across multiple asset classes, identifying missing values, mismatched fields, and metric discrepancies.
- Developed Python scripts to wrangle, transpose, and aggregate vendor datasets, creating standardized outputs for cross-checking, QA validation, and downstream analytics.
- Optimized dashboard performance by converting 120+ Tableau calculations into backend Athena SQL, standardizing metric definitions, cutting refresh times from 5–10 minutes to under 2 minutes, and reducing processing costs by 97%.

Concept ABS Data Pipeline Automation: Morningstar DBRS, SFA Data Analytics Team Sep 2023 – Feb 2024

- Automated ABS loan data ingestion, cleaning, and transformation from AWS Athena into repeatable Tableau Prep workflows, reducing a 3-day manual process to a one-click workflow with 2–3 hours of review.
- Standardized recurring loan datasets and documented transformation logic, data cleaning rules, and QA procedures to support repeatable research reporting and data governance.

LEADERSHIP EXPERIENCE

Career Management Center Student Assistant: UC San Diego, Rady School of Management Feb 2026 – Present

- Curated and posted 100+ job opportunities on the Rady Career Management Center website by researching relevant roles, reviewing employer submissions, and approving job postings to support student career search efforts.
- Built an Excel tracker to monitor Rady Career Management Center website engagement and shared student facing insights on event content, timing, and outreach strategies to support stronger student attendance.

ERG Leadership Member: Women In Technology, Morningstar Inc. Jun 2024 – Jun 2025

- Organized 5+ ERG events to increase engagement and create networking opportunities across the organization.
- Coordinated event logistics, communications and leadership updates to keep initiatives well-structured and visible across the organization.
